Report of Schools.

The Superintendent and Superintending School Committee's report and recommendations.

CITIZENS OF NORRIDGEWOCK:

The following is the report of the schools for the year ending February 15, 1919.

The past school year has been rather broken; due to two reasons, first, influenza; second, shortage of teachers. We have, however, met with more than average success.

We have, this year, begun the use of the State of Maine Admission, Promotion and Discharge Cards. These cards furnish a complete data of the pupil from the time of admission to the time of graduation or transference.

The spring term should bring the completion of the grading of the rural schools. Beginning next fall we would advocate the use of a course of study. By this method the rural schools would be placed on the same footing as the village schools. The work would tend to be unified, each school covering the same amount of work in practically the same period of time.

The teachers of the rural schools have been shifted more than we like, however each change made has seemed to be absolutely necessary. The full number of weeks will have been maintained if no further sickness arises.

VILLAGE SCHOOLS.

There has been but one change in the teaching force of the village schools. Miss Jones takes the place of Miss Packard in the Primary grades. The entire work has been very satisfactory.

Mrs. Burgess has held her grades in the schoolhouse near the railroad. The quarters there are very comfortable. It will probably be necessary to keep the school there for two or three years at least unless conditions are radically changed.

HIGH SCHOOL.

The enrollment of the high school is the largest it has been for many years. This necessitated the use of more room. The surplus is conveniently and comfortably housed in the third and fourth grade rooms. Mrs. Miller now teaches the entire day.

The chemistry laboratory is in better condition than ever before. More apparatus is needed in the Physics department.

The high school has been classified as an "A" school and there is no reason why this standard should not continue. We do wish however, that more citizens and parents would visit the high school, in fact, all the schools, and see for themselves just what is being done.

TEXT BOOKS.

Our text books and supplies have cost us more than usual for two reasons; first, increased cost of materials; second, the larger number of books necessary for the increased enrollment of our schools.

REPAIRS.

Our repair account is in good condition when we consider the amount of work done. The blackboards of all the schools have been painted and all necessary repairs have been made. The schoolhouse near the railroad has been put in good condition. The Oak Hill and Sandy River schoolhouses need a few repairs.
